Introduction

I am going to provide a software solution for my mother who is planning to make a summer camp for Hungarian little kids whose parents want them learning their other native language. My mother, Anita Foldi is working at an online Hungarian school which is based in the USA however, they are providing lectures worldwide, and she also has her own business for teaching kids the beauty of our native tongue. The approach I am going to follow is that the game I am going to develop can make a fun time while the children are learning.

Description

The idea of this Boribon Game is that the user can see seven balloons which belongs to the little bear, Boribon. Boribon is going to ask for help fixing the gifts which the player needs to paint. Because this game is going to be used for kids who have not learned how to read yet, there will be a hint at the bottom of each balloon (the correct color is going to be appeared there). After, the child paint all the presents of Boribon (clicked all the objects), the game is ended. Boribon can go to give the presents away.

Technical Requirements

Operating system

All operation systems that can run JavaScript (at best the latest version, ECMAS2021; at least ECMAS2016).

Language

JavaScript and jQuery

Hardware

Type	Lenovo
Device name	DESKTOP-DG18NQA
Processor	Intel® Core™ i7-3537U CPU @ 2.00GHz 2,50 GHz
Installed RAM	8.00 GB (7.88 GB usable)
Device ID	79674A67-415B-44AA-8594- 8BA5460C01A2
Product ID	00326-10000-00000-AA441
System type	64-bit OS, x64-based processor
Pen and touch	Touch support with 10 touch points

Windows specifications

Edition	Windows 10 Home
Version	20H2
Installed on	25/04/2021
OS build	19042.985
Experience	Windows Feature Experience Pack 120.2212.2020.0

Software

Visual Studio Code. Using the latest version, thanks to auto-updates.

Timeline

The project is going to take approximately 4 weeks, from the date of confirmation.

The timeline and process steps are listed below:

Weeks	Tasks
3	Getting an idea, make the proposal document and the technical design.
4-7	Implement and test the code continuously.
8	Hand-in the final assignment.
